

HS SERIES - HOUSEHOLDS

HS - PVC Filter Housing series

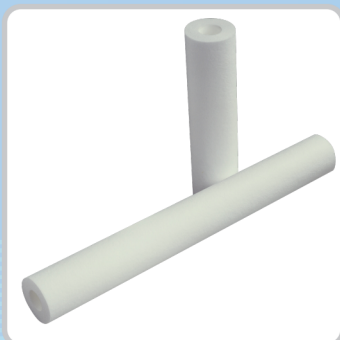

AquaSource PVC single cartridge housings offer an economical solution to low flow needs. Reinforced polypropylene housings have excellent chemical resistance and are ideal for many residential, commercial and industrial applications.

HS - PP series

PP-series, polypropylene sediment filters, offer high dirty holding capacity required fewer change-outs. Our melt-blowing technology makes an unique feature of graded density that uses the entire depth of filter to trap sediment, translating into higher dirt-holding capacity, longer life and fewer change-outs.

HS - CB series

CB-series, carbon block filter, provides chlorine, taste and odour reduction capabilities that outperform granular activated carbon filters. 100% coconut shell carbon core offers a strong uniform, permeable filter medium that prevents channelling, bypassing or fluidizing throughout service life. Wrapped with a protective layer of spun filter matting and an outer netting, our CB-series removes silt sized particles and extends filter life.

Ordering Information

Model	Description
HS-CB-10	Carbon Block Filter 10-inch
HS-CB-20	Carbon Block Filter 20-inch
HS-PP-05-10	PP Cartridge 5-micron 10-inch
HS-PP-05-20	PP Cartridge 5-micron 20-inch
HS-PP-05-30	PP Cartridge 5-micron 30-inch
HS-PP-05-40	PP Cartridge 5-micron 40-inch
HS-PVC-10	PVC Filter Housing for 10-inch Filter
HS-PVC-20	PVC Filter Housing for 20-inch Filter
HS-LDPVC-10	Large Diameter 10" PVC Filter Housing
HS-LDPVC-20	Large Diameter 20" PVC Filter Housing
HS-LDPP-05-10	Large Diameter Filter 5-micron 10-inch
HS-LDPP-05-20	Large Diameter Filter 5-micron 20-inch
